Me

Profile

I am currently an undergraduate student (2018-2021) studying Artificial Intelligence in the University of Birmingham. I have developed excellent programming skills and analytical skills during the time. For now, Java is my most familiar language and I have been also learning Haskell, C/C++ and Python in my second year study. I have great interests in Machine Learning, Human-Computer Interaction, Computer Vision. This means that my study will be in the direction of Artificial Intelligence.

Outside the uni life, I am willing to meet more people who are better than me. Sometimes it is like climbing a mountain, from 0 to 100 meters high, then go from 100 to 1000... and the landscapes are unique. I am keen to view somewhere far enough and wide enough.

My hobbies are diverse, for example cooking, astronomy, gaming and classical music. Among them my favorite is playing game and FPS style is the one I like most.

Education

Kaplan Foundation Education | University of Liverpool

Overall 82%

- Physical Science (79/100)
- Algorithms, Programming and Data Representation (91/100)

- Mathematics of Science and Engineering (91/100)
- Skills of Study (69/100)
- Language for Study 3 (Exempt - Accredited Prior Learning)

Artificial Intelligence and Computer Science BSc | University of Birmingham

1st Year : weighted average 71%

- Java Fundamentals (76%)
- Foundation of Mathematics (58%)
- Data Structure (73%)
- Logic and Computation (74%)
- Artificial Intelligence (69%) (completed 2 team projects based on EV3 robot)

2nd Year - PRESENT : N/A

- Advanced Functional Programming
- Software Engineering (UML; designed a software of handling sleep disorder in a team with 6 people)
- Systems Programming in C/ C++
- Mathematical Modeling and Decision Making
- Java Team Project
- Security and Networking

Internship

- I fortunately joined CSSA Birmingham which is Chinese academic organization. I engaged in organizing several events and festival parties with other members.

During the time, I gained personal skills such as cooperation technique and organizing skills. (1 year)

Skills

English : I have obtained 6.5 overall in IELTS in 2017. I can confidently communicate in English.

Programming : highly trained in Java, know how to program in C and Haskell, and currently am learning Python; Know how to use basic UNIX commands; know HTML, CSS, Mark-down language and Javascript.
